Introducing our new Partner – Dr Vinny Wang

In our Christmas newsletter last year, we first introduced Dr Vinny Wang, a graduate of La Trobe University who was employed during 2021 to help us clear some of the backlog of care created by Covid lockdowns.

Vinny first became known to us early in her career when she was mentored by Dr Tony Robertson, as part of an ADA program. She worked in private practice in Shepparton with Dr Duy Ho, who previously worked here at BDG. Before moving back to Melbourne, Vinny also taught and examined dental students at La Trobe Bendigo. She has since settled back home and has spent the last few years working in our neighbouring communities.

Vinny is also passionate about using her skills to care for people in need. Her philosophy “to be compassionate and generous” led Vinny to participate in volunteer dental programs in Philippines, Tara QLD, Mt Druitt NSW and North Richmond Community Health.

Vinny is a gentle, caring dentist who speaks fluent Mandarin, and we are delighted to announce that she will be a permanent addition to the team as a principal of the practice.

She finds joy in helping patients overcome their fears of the dental environment through a patient and gentle approach to their treatment.

Jenny and Will are taking this opportunity to wind down their involvement, feeling very confident that our clients and staff are in very capable hands.

PIC Philippines *Vinny's church medical missions' trips (2016 & 2017) where they flew self-funded dental teams & equipment from Melbourne to treat locals living in poor conditions.*

PIC Mt Druitt NSW *Across a few days Vinny helped to set up a portable, temporary dental clinic and treat the low socio-economic community.*
